
EVIDENCE TO IMPACT

VANUATU 2ND HEALTH RESEARCH SYMPOSIUM

National Convention Center, Port Vila

23 – 24 September 2021

EVIDENCE TO IMPACT

- This statement alone is very powerful for us health workers.
- As health workers we know that medical information changes everyday. What was an acceptable practise 10 years ago no longer applies today. Therefore, in order to provide quality health service to the pple of Vanuatu we need to revisit the existing evidence to make that desired impact of quality health care. Therefore, this symposium is very important as it is here that it nourishes and grows that culture to do research in order to provide the evidence that is needed to make a direct impact of improved health care for ALL citizens and non citizens of Vanuatu.

- This is in keeping with MOH mission statement which is to protect and promote the health of all people in Vanuatu.
- In addition to the above the new HSS 2021-2030 document under the section of HSS Strategic Vision, Goals and Objectives

5. 1 Improve access of managers and clinicians at national and provincial levels to timely and accurate information to support evidence-based decision making for managerial, clinical and system planning, decision making and reporting.

5.8 Establish and strengthen systems and oversight mechanisms for the promotion and support of structured, operational and clinical research to inform program/service delivery planning and implementation

ACKNOWLEDGMENT

- DFAT through VHP
- MFAT through NZMTS
- MOH
