
ELECTRONIC DATA REGISTRY TO HELP INFORM THE EMERGENCY DEPARTMENT ON KEY PERFORMANCE INDICATORS

VEGA TUEN KAUH /EMERGENCY MEDICAL OFFICER/VILA CENTRAL HOSPITAL/23TH SEPTEMBER 2021

VANUATU 2ND HEALTH RESEARCH SYMPOSIUM

Holiday Inn, Port Vila

23 – 24 September 2021

INTRODUCTION

- Key Performance Indicators an essential tool to assess patient safety satisfaction
- Provides objective information on crucial aspects of treating patients
- electronic registry system was implemented in Vila Central Emergency Department

METHODS

- In 2021 an electronic data registry was implemented in which patient information including demographics, presenting complaint, timeline of stay in the Emergency Department, diagnosis and interventions performed. It also provided data on Health surveillance including communicable, non-communicable diseases and research conditions.

Data

METHODS

VCH Emergency Department Registry

Patient details

MRN

Age *

Gender *

- Male
 Female
 Other

Registration

Registration date and time

DD-MM-YYYY  HH : MM

Date Hour Minutes

Location *

- Emergency Department
 Outpatient Department

Arrival mode *

- Ambulance
 Other

Referred patient *

- Yes
 No

Triage

Triage date and time

Date Hour Minutes

Triage officer designation

- MO
- NO
- NA

Visit type *

- New
- Return - unscheduled
- Return - scheduled
- Medication supply only

Triage category

- 1
- 2
- 3

Treatment date and time

Date Hour Minutes

Treating clinician designation

- MO
- NO
- NA

Investigations

- X-ray
- Ultrasound
- Blood tests

Management

- Medication chart
- Tetanus immunisation
- Sutures
- Dressings
- Asthma treatment
- Medical certificate

Disposition

Diagnosis

Disposition *

- Discharged
- Deceased
- Admitted

Date and time of discharge

Date Hour Minutes

Left without being seen?

- Yes
- No

Date and time of death

Date Hour Minutes

Dead on arrival?

- Yes
- No

Date and time of referral

Date

Hour:Minute

Team

- Medicine
- Surgery
- USG
- Paediatrics
- Other

Date and time of transfer to ward/discharge

Date

Hour:Minute

Ward

- ICU
- Medical
- Surgical
- USG
- Paediatrics
- Other

Surveillance

Communicable

- Acute fever and rash
- Prolonged fever
- Influenza-like illness
- Watery diarrhoea
- Dengue/Zika/Chikungunya-like illness
- Acute jaundice
- Acute fever and neurological
- Ciguatera fish poisoning
- Acute flaccid paralysis
- Neonatal tetanus
- Diphtheria
- Pertussis

Non-communicable

- Motor vehicle accident
- Work-related injury
- Other trauma
- Self-harm
- Domestic violence
- AMI/Stroke
- Diabetes complications
- Asthma
- COPD

Research

Research conditions

- Severe trauma
- Severe head injury
- Ruptured ectopic
- Septic shock
- AMI
- Severe asthma/COPD/PNA
- Acute bacterial meningitis
- Acute surgical abdomen

RESULTS

- Retrospective analysis of the data registry has provided key information which we have been able to use to improve data surveillance, monitor important public health conditions, improve patient safety, and implement innovative treatment models and identify gaps in our health care delivery. By the end of our retrospective analysis of the data we aim to identify crucial health trends amongst the Vanuatu population presenting to the Emergency Department at Vila Central Hospital.

RESULTS

All presentations by month

All presentations by triage category

All patients by age

All presentations by disposition

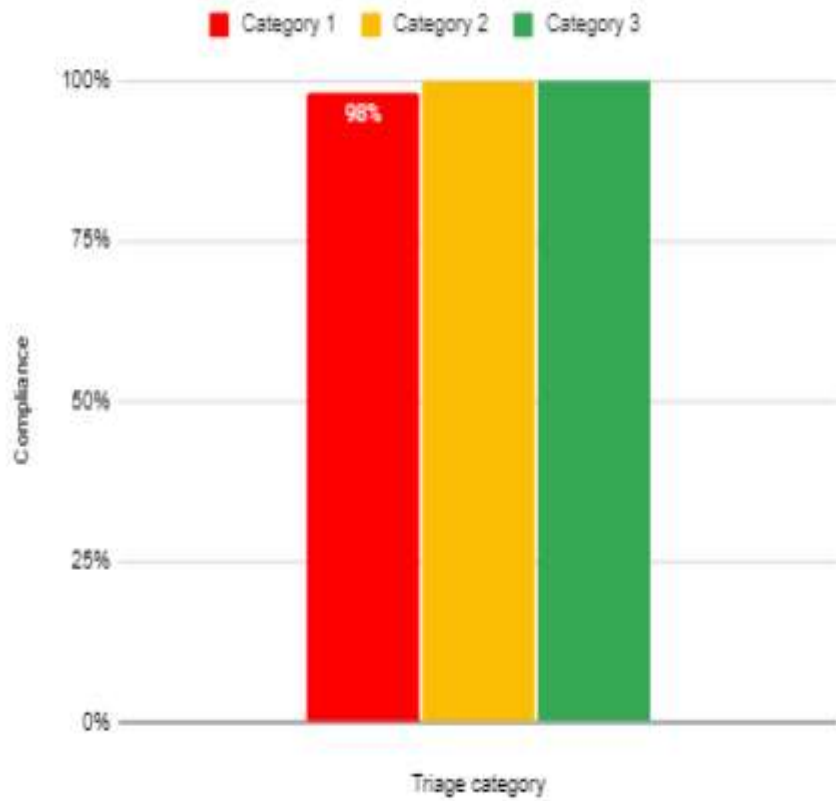

Admitted patients by team

Referred patients by province

Target compliance: assessment (triage - treatment) times

ED LOS less than 12 hours

60%

DISCUSSION

- The electronic data registry is the first of its kind in Vanuatu Emergency Departments which allows us to improve the delivery of health care to patients, identify important trends in public health conditions, evaluate our effectiveness and enable us to compare our standards to global emergency departments using objective measurements.

RECOMMENDATIONS / IMPLICATIONS

- Implement a permanent data registry
- Utilize data registry to analyze KPI annually
- Employ permanent staffs for data registry
- Use key performance indicators to monitor progress of hospital
